

ANDREW HALL

REGIONAL MANAGER PRINCIPAL ENGINEER

MSc (Min Ec), BSc (Civ Eng), Grad Dip Project
Management
AusIMM (CP), MEA

EXPERTISE

Andrew's primary expertise is in business and operational analysis, strategic and operational planning, technical assessment and project management. He has experience in mine operations, mine planning, economic and financial evaluation, benchmarking studies and feasibility assessments.

SUMMARY OF EXPERIENCE

Andrew became Regional Manager of AMC's Melbourne office in August 2007, where he is responsible for 50 consultants, engineers, geologists and support staff. Prior to this he was Mining Manager, Melbourne from September 2005 and was promoted to Principal Engineer in July 2006. Andrew began his career as a graduate engineer with AMC in 1995.

More recently, Andrew's responsibilities include the economic and financial analysis, and technical assessment of a significant number of projects. He has conducted numerous mine optimisation and benchmarking studies and developed mine performance reporting structures. Andrew has also managed and participated in numerous open-pit and underground mine feasibility studies.

Andrew has worked in various technical and management roles, including Whittle open pit optimisation analysis, open pit and underground mine design and scheduling, capital and operating cost estimation, feasibility studies and site based support for various projects in Australia, Africa, Asia (including India) and North America.

Andrew holds a Bachelor of Science in Civil Engineering from RMIT University and a Masters in Science in Mineral Economics from Curtin University. In 2009, he gained a Graduate Diploma in Project Management from Deakin University.

Andrew's full resume is available upon request.
