

## JULIA MARTIN

### PRINCIPAL MINING ENGINEER

BSc (Mining Engineering)  
MBA  
Registered Professional Engineer of New Brunswick,  
Canada  
MAusIMM (CP), RPEQ

#### EXPERTISE

Julia's expertise is in the areas of mine planning, feasibility studies and project management. She has experience in both underground and open pit mining as well as corporate activities across sites in Canada, Australia and Africa.

#### SUMMARY OF EXPERIENCE

Julia completed her Bachelor of Science in Mining Engineering degree at Queen's University in Ontario, Canada in 1994. Upon graduating, she obtained experience with base metal, underground mining as well as project management through Noranda Inc (now Xstrata plc). She worked in various mine planning and project management roles initially at the Brunswick Mine in New Brunswick, Canada and later at the Noranda Technology Centre in Quebec, Canada.

After relocating to Australia in 2003, Julia gained experience in gold, open pit mining through her roles as Mine Engineer and Mine Superintendent with Sons of Gwalia Ltd (now Saracen Minerals Holdings Limited) at the Carosue Dam Operations in Western Australia. She then went on to work for St Barbara Limited in a corporate capacity and coordinated the feasibility study for the Gwalia Deeps underground mine. While working with St Barbara Limited, she commenced her MBA at Curtin University in Western Australia.

Following the completion of her MBA in 2008, Julia obtained further gold, open pit experience through her role as Chief Mine Engineer at the Sabodala Gold Operation in Senegal, Africa.

Julia joined AMC in December 2009 and has focused primarily on open pit mining studies and technical reviews for projects in Australia and Africa.

Julia's full resume is available on request.
